Final Site Proposal

_____ For my final site I am planning to expand on my site from the midterm. There were some critiques that I received and thought were really good ideas. I plan to keep the layout of my navigation and header the same and I also plan to keep the social media icons as well as footer the same. Below is a list of what I plan to change and/or add/takeaway from the site.

- Remove the underlining from the navigation, change the navigation style to bottom. Add title to the pages so you know where you are . I also want the navigation to be responsive so it follows you as you scroll the page.
- Organize the images, make them smaller and appear as a card with an option to heart the image. The heart will pop out momentarily after you click it.
- Make the images clickable. When users click on the image a second pop-up window will appear with a small blurb about the image. Also with further breakdown of the price. (i.e, sticker - \$1.29, small card print \$5.00, acrylic keychain \$9.95)
- I will add at least two videos to the Helpful Art Tips page.
- If possible I want a small animated character of me to stand next to the About Me blurb.
- Add filtering to the Help page. Reformat the page so it looks like pages from a book.
